CATS PREFERRED TO HUSBANDS.

Chicago School Teacher Gives Reasons for Her Theories.

We forget who it was that coined the phrase, "all big things come from Chicago," but we would like to add that occasionally some big thoughts are also born in that metropolis of the West.

A Chicago teacher, who we may add York. is at yet heart and husband free. evolved the interesting theory that as a life companion a cat is far more preferable than a man.

After enumerating the faults of an average husband, she proceeded to tell of the high qualities of a cat, and when she came to that part in her oration when comparisons became necessary, poor husbands had not a leg to

The three strongest points that she made were that cats trim their own whiskers, never complain and, if they happen to come home late in the wee small hours, they do not invent excuses, and though guilty of misbehavior, they never walk diagonally across the room, chewing a secondrate cigar and vainly endeavoring to make themselves understood.

Well, it seems as if the cats had the better of it, and so far no defender of poor downtrodden man has appeared on the scene.- Exchange.

Jefferson's Cheerful Philosophy.

We spoke of happiness, writes Francis Wilson, in Scribner. "Joy," I said, "was the God of our house hold. No one was permitted to hang crepe on the door of our feelings. "That's the proper way," he made answer. "Happiness is the religion of our family. To begin with, we take all the comic papers. No one is permitted to read aloud, and he is begged not to read, even to himself, about the mangled corpse of the father and the roasted bodies of the bables-subjects with which the daily papers disgustingly teem."

Thief Laughs at Bobbies. Although more than twenty police men tried to capture a thief in the West End of London, he did some daring climbing over roofs, and eventually escaped.

A CURE FOR DEBILITY

Dr. Williams' Pink Pills A Reliable and Bloodiess.

When the body is weak and the blood thin it is sometimes difficult to find the cause unless a wasting illness has preceded, or the sufferer happens to be a girl on the verge of wemanhood.

Obscure influences, something unhealthful in one's surroundings or work, may lead to a slow impoverishment of the blood and an enfeeblement of the whole body. When a serious stage has been reached there seems to be nothing that will account for it.

Mr. C. E. Legg, of Tipton, W. Va., has found a successful method of treating weakness and bloodlessness. He

says:
"I used Dr. Williams' Pink Pills for weakness caused by a lingering malarial fever that began in the spring of 1896. The worst effects of this were indiges tion and a bad state of my blood. I was aniemic, as the doctors say. People generally would say that I didn't have blood enough, or that I didn't have the right kind of blood; mine was too thin. My kidneys and liver were out of crder.

I was badly annoyed by sour risings from my stomach. There was a good deal of pain, too, in my back and under my right shoulder blade."

"How long did these troubles last?"

"For over two years. For four months of that time I was under the care of a physician, but his medicine did me no good. Meanwhile I learned of the cures that had been wrought by Dr. Williams' Pink Pills."

"You owe your cure to these pills?" "I certainly do, and I also know that they are helping others to whom I have recommended them. They have real merit and I know of nothing that would

FATAL TO ALL DISEASE GERMS.

Effect of Acids of Fruits on the Hu

man System. An eminent Japanese bacteriologist has shown that the acids of lemons. apples and other fruits-citric acid. malic acid-are capable of destroying all kinds of disease germs. Cholera germs are killed in fifteen minutes by emon juice or apple juice, and typhoid fever germs are killed in half an hour by these acids, even when considerably diluted. If you squeeze lemon into a glass of water containing cholera germs, and let it stand fifteen or twenty minutes, you may drink the water with impunity, as the germs will be dead; these juices will kill other disease germs, says the New York Herald. Instead of telling a man to have his stomach washed out, we can now tell him to drink orange juice, which will cleanse the stomach as thoroughly as a stomach tube, provided it be not a case of gastric catarrh. If we have to deal with gastric catarrh, in which there is a large amount of tenacious mucous adhering to the walls of the stomach, a stomach tube to dislodge It is required, but in ordinary cases of biliousness, foul tongue, bad breath, sick headache, and nervous headache a fruit diet is a wonderful purifier.

EVERYDAY FORM OF GREETING. There Are Many Kinds of Hands and

Many Ways of Shaking Hands. Did you ever notice the difference in hands and handshakes? Well. there is a difference, and it's mighty interesting, too.

One person will offer you a big. brawny hand that gives a good, hearty shake, while another hand that is just as big and brawny will feel like a log.

Some one else will offer you a hand that you could reach around with your little finger, and yet the grasp is warm and sympathetic, while the same hand worn by another will feel like a slender icicle, and the quicker you let go the better.

Then, there are the fat hands, the long hands, the short hands (not stenographically speaking) and many other kinds of hands, but it all de pends on how the wearer uses them as to whether or not you care to shake again.

The manner of shaking is worth noticing also. Some folks come to you with a straight arm jab, others us. a cherry picking movement and make you reach up to a level with your forehead, others grab your hand as low down as possible, while there are others who bend their arms so that you not only shake again, but you rub arms from the elbow to the

fingers. And then there are those who shake hands naturally and gracefully. -Abilene Chronicle.
